

Semester:	3rd [cite: 1]	Subject Code:	DI03016061 [cite: 1]
Subject Name:	Operating Systems [cite: 1]	Last Date:	25/9/2026
Assignment:	Unit - 3 (Memory Management) [cite: 1]		

Assignment Questions & Bloom's Taxonomy Mapping

Q.No.	Question Description	RBT Level
1.	Define Process Address Space and list its fundamental components [cite: 1].	Remember (R)
2.	Explain the concept of swapping in operating systems along with its role in memory management [cite: 1].	Understand (U)
3.	Describe contiguous memory allocation [cite: 1]. Explain how memory is managed using fixed and dynamic partitions.	Understand (U)
4.	Explain the principle of Segmentation [cite: 1]. How does segmentation support the user's view of memory?	Understand (U)
5.	Describe the concept of Paging [cite: 1]. Explain how a logical address is translated into a physical address using a page table.	Understand (U)
6.	Consider a logical address space of 16 pages with 4 KB page size mapped to a physical memory. Calculate the total size of the logical address [cite: 1].	Application (A)
7.	Analyze the major differences between Paging and Segmentation memory management techniques [cite: 1].	Analyze (N)

Note: Submit the handwritten or neatly typed assignment on or before the specified last date. Ensure proper diagrams are drawn wherever applicable.
